Sun, April 20: SW Divisional, Zachary, LA  
(Sponsored by AutoXForum.COM and Mongo Racing)

**What is Autocross?** Autocross is a form of motorsports that emphasizes safe, low-cost competition and active participation. An autocross is a timed competition where drivers navigate one at a time through a temporary course marked by traffic cones, rather than racing on a track with multiple other cars, as in road racing or oval racing. Autocross tends to place more emphasis on car handling and driver skill than on sheer horsepower, and events typically have many classes which allow almost any vehicle, from economy sedans to purpose-built vehicles, to compete. Speeds are slower in absolute terms when compared to other forms of motorsports, usually not exceeding highway speeds, but the activity level is high due to a large number of elements packed into each course. Autocross courses are typically 40 to 70 seconds in length. Autocrossing is a good way to learn skills that transfer to road racing, as drivers learn vehicle control in a safe, controlled, and competitive environment.
